

The questions for the consultation are outlined in the table below. Give the answer you think a representative of a public service would provide for each of the questions.

How satisfied are you that the proposed measures will address the problem of nitrogen dioxide as quickly as possible?
What do you consider to be the most appropriate way for local authorities in England to determine the arrangements for a Clean Air Zone, and the measures that should apply within it?
How can Government best target any funding to support local communities to cut air pollution?
How best can governments work with local communities to monitor local interventions and evaluate their impact?
Which vehicles should be prioritised for government-funded retrofit schemes?
What type of environmental and other information should be made available to help consumers choose which cars to buy?
How could the Government further support innovative technological solutions and localised measures to improve air quality?
Do you have any other comments on the draft UK Air Quality Plan for tackling nitrogen dioxide?
