

Task One:

We have looked at the public services in general but what about the emergency services? First consider the information that has already been discussed in the online session, and then undertake some additional research to find out what the impact might be on the Police, Fire and Ambulance Services. When you have completed your research record the information in the chart below.

Emergency Service	What has been the impact of the migration policy on the service?
Police Service	
Fire Service	
Ambulance Service	

Task Two:

The local elections are fast approaching. Migration is an issue in the local area. The existing candidate has no policy on migration. With your new found knowledge on the Migration Policy and its impact on the public services you have been asked to make a speech at a pre-election meeting. You therefore need to identify how the present migration policy will affect the public services and subsequently impact on members of the public. Use this PDF to record your notes and the outline of your speech ready for your attendance at the pre-election meeting.

Use this section to record your notes. Think about the information that has been discussed during the on line session. Identify the different public services that might be affected and consider what the impact might be for each of the services. Then look at how this might impact on members of the public.
