### Task

Using the key points from the debate, can you create a balanced argument for and against the issue of reducing car insurance premiums for young drivers?

Start by revisiting the key points made and put them into two different columns. List the comments you think would support the **reducing** of car insurance premiums and those that would support **maintaining** the present car insurance premiums. What is your opinion? Also add any additional comments to either side of the argument that you feel are relevant.

Arguments to support the <b>reduction</b> of car insurance premiums	Arguments to support <b>maintaining</b> the present car insurance premiums

Now that you have both sides of the argument which side of the argument would you favour?

In the space below, outline the reasons for your decision.

Your response to the debate
